

FlexiMounts Introduces GR48 4' x 8' Overhead Garage Storage Rack for Organized Homes & Garages

8/10/21 – FlexiMounts is quickly gaining popularity as the leading racks and shelves brand worldwide. The new GR48 4' x 8' Overhead Garage Storage Rack continues FlexiMounts' legacy of sturdy and solid products. The overhead storage shelf is designed to help homeowners make the most of their garage and maximize the storage space.

Generally, the amount of storage space in the garage is limited, especially when a car is parked inside. It can lead to a cluttered garage overflowing with objects. In many cases, the clutter can make it difficult to navigate through the garage and even pose safety threats. Consequently, many people resort to leaving their automobiles outside, exposed to the elements and the risk of theft and damage.

Luckily, FlexiMounts brings us the perfect solution to this problem: GR48 4' x 8' Overhead Garage Storage Rack. As the name implies, these racks make good use of your ceiling space and assist you in clearing the clutter. However, FlexiMounts GR48 4' x 8' Overhead Garage Storage Rack is not your average overhead rack. Here are some features and plus points that make this ceiling rack the preferred choice of consumers across the USA and Europe.

Great Weight Capacity

FlexiMounts GR48 4' x 8' Overhead Garage Storage Rack comes with a maximum loading of up to 600 lbs. The greater weight capacity means homeowners can easily store heavier objects, including vehicle tires, tools, equipment, and other items, without worrying about overloading the rack.

48" wide and 96" long, it is spacious enough to provide ample storage space. Homeowners can also employ matching hooks to add more storage space and make the most of their overhead racks in terms of storage space and weight capacity.

Height Adjustable

One of FlexiMounts GR48 4' x 8' Overhead Garage Storage Rack's biggest selling points that win it a competitive advantage over regular racks is that the FlexiMounts rack is height adjustable. The height can be adjusted between 22" and 40" to provide homeowners with a flexible storing option.

The adjustable height feature also means that the rack can be installed in a variety of settings. Therefore, it is one of the best options for tenants who are looking for something more flexible, portable, and easy to install and reinstall.

Compatible with Multiple Joist Spacing

FlexiMount GR48 4' x 8' Overhead Garage Storage Rack is compatible with multiple joist spacing. However, it is best to study the dimensions of your garage and particular installation to accommodate it properly. Keep in mind that the rack is 4' x 8' and needs to be positioned perpendicular to the floor joists to distribute the load evenly across six supporting branches.

Moreover, it will accommodate any home foundation. Do you have studs in your ceiling? You'll love the GR48 4' x 8' overhead garage storage rack. It is the ideal choice for ceiling studs and concrete ceilings. There's no need to be concerned because the rack is completely safe and well-organized regardless of the type of foundation. FlexiMount always prioritizes safety no matter where the GR48 4' x 8' overhead garage storage rack is installed.

Easy Installation

FlexiMounts GR48 4' x 8' Overhead Garage Storage Rack is all about convenience and premium user experience. Therefore, it does not come as a surprise that the rack is easy to install and comes with installation manuals and technical drawings detailing the installation. An installation template is also supplied to assist in devising a strategy for storing belongings most efficiently.

Furthermore, in addition to the garage rack, the package contains a hardware kit to ensure easier installation. High-quality screws that are thicker than average screws are also provided. The heavy-duty screws ensure higher safety and easy installation. To further facilitate its clients, FlexiMounts have plenty of online content on how to install the racks in just a few steps and make the most of it.

Proper installation can help enhance support and stability. Therefore, it is advisable to check out the GR48 4' x 8' Overhead Garage Storage Rack installation video tutorial [here](#).

Multiple Uses

While primarily designed for garages, the overhead rack can be installed at various locations around the home. These storage ideas aren't limited to the garage. Anything is possible with these FlexiMounts garage racks with a little creativity and imagination. Homeowners will not only benefit from all the additional space, but they can also design a storage area that is never congested. Try installing an overhead garage rack in the following places.

The Attic: This works best if the attic has a higher ceiling. The attic already serves as the storage center of the house, so why not elevate it with an above garage rack to make it look even more organized?

Loft Apartment: Some loft apartments simply do not have enough storage space. Therefore an overhead garage rack from FlexiMounts will provide you with the additional storage area you need to keep your stuff organized and clutter-free.

Bedroom: Installing an overhead storage rack in your bedroom may not sound appealing at first. However, with a little creativity and bravery, it can work! Many homeowners take the time to beautify this garage rack for the bedroom. Fairy lights and imitation vines and leaves work great to create a fantasy environment. Homeowners also work with cotton clouds, dangling stars, and miniature hangings to enhance the aesthetic appeal. There is no cap on creativity.

Considering the exceptional features of the GR48 4' x 8' Overhead Garage Storage Rack, it is easy to see why it is quickly gaining popularity since its launch in **[enter month]**. In addition to the high-quality and extraordinary features of the rack, the success of the product in the market can also be attributed to the dedicated team at FlexiMounts that goes out of the way to assist clients and customers both before and after the sales.

FlexiMounts also offers a limited lifetime warranty and 30-day risk-free refund policy to ensure customers can purchase without any second thoughts and complete peace of mind. No restocking fee is applied for items that are returned in "like new" conditions. However, shipping and restocking fees may be applied if the rack is returned after 30 days.
